

ZEISS Experience Days 2024

The Power of UNIVIEW

All eyes in the planetarium world will be on Jena and Berlin in the summer of 2024 to mark the highlight of the international anniversary year for the 100th birthday of the projection planetarium.

We at ZEISS, Planetarium Division, see this as a wonderful opportunity to relaunch our popular Experience Days. Future customers and established users of our products are invited to take part.

The latest features of UNIVIEW are on the program as well as news about our current product portfolio and application examples. Further information will follow.

Interested persons can already register their participation by email at planetarium@zeiss.com.

July 17 - 19
